

OFFSHORE **W**IND **R**EVOLUTION

Building the industry
and getting the ports ready

Conference, Working Group & Networking

7/9

OCTOBER 2026

TARANTO

Innovative networking event designed to support the development of the offshore wind supply chain in Italy and the Mediterranean

FORMAT

WORKING GROUPS

A genuine opportunity for shared and collaborative dialogue, aimed at fostering a fertile environment for new projects.

NETWORKING DINNER

An invaluable opportunity to forge new business relationships in a relaxed and welcoming atmosphere.

CONFERENCE

An effective platform for exchanging information between leading operators and institutions in the Italian and international sector.

NEW

OWR EXPERIENCE

An exclusive full-day immersive experience combining privileged access to industry-leading facilities, stakeholder engagement and high-value networking opportunities

TARGET

The three-day initiative will gather institutions, policymakers, port authorities, associations, industry clusters, R&D organizations, financial institutions, energy companies, technology providers, manufacturers, shipyards, shipowners, port & logistics operators, as well as consulting and engineering firms.

International Market Outlook and European Success Stories

Explore the dynamics of the global offshore wind market through European case studies showcasing successful development strategies, investment models, and environmental impacts, providing valuable insights into the sector's future trajectory.

The Emergence of Offshore Wind in Italy and Employment Opportunities

Discover how Italy is laying the foundations for its offshore wind industry, from regulatory frameworks and early projects to the growing demand for skilled professionals across engineering, installation, operations, and maintenance.

Role of Intermediary Institutions in Building the Italian Offshore Wind Ecosystem

Regional and territorial authorities play a key enabling role in the development of the offshore wind ecosystem, shaping permitting processes, infrastructure planning and territorial integration. In Italy, their strategic action can act as a driver to accelerate national policy implementation and support the Government in building a competitive and sustainable industry.

The Role of Ports and Regions in Supply Chain Development

Understand how ports and regional authorities act as key enablers of offshore wind growth by supporting infrastructure development, integrated logistics, and territorial collaboration to build a competitive and sustainable domestic supply chain.

Technological Innovation and the Reduction of Costs and Risks

Explore the latest advancements in floating wind technology, digitalization, and artificial intelligence that are helping reduce costs and mitigate risks, making offshore wind more efficient, reliable, and scalable.

Communication and the Offshore Wind Narrative

Examine the challenges of communicating offshore wind's benefits in an increasingly complex information landscape. From misinformation and public concerns to industry engagement and stakeholder trust, discover how effective communication can strengthen social acceptance and support the sector's sustainable growth.

MAIN TOPICS

STEERING COMMITTEE

Enrico Carloni
Energy Expert
Embassy of Denmark in Italy

Mattia Cecchinato
Senior Advisor
Wind Offshore WindEurope

Alessandro Corsini
President
OWEMES

Giovanni Gugliotti
President
AdSP of the Ionian Sea
Port of Taranto

Fulvio Mamone Capria
President
AERO

Mauro Migliavacca
Special Advisor for Business
Relations Norway-Italy
Innovation Norway

Alexio Picco
Chairman
Magellan Circle

Luigi Severini
Engineer
iLStudio Engineering
